

## **iView Systems Announces Integration with Guard Tour Systems to provide their clients with the best in Security Patrol Software**

---

**For Immediate Release**

**Oakville, Ontario — August 20<sup>th</sup>, 2008 — iView Systems, a leading provider of security and surveillance solutions,** today announced it has collaborated with Guard Tour Systems, Tour Trax Product, in provide iTrak clients, the best in Integrated Security and Surveillance Systems. The Electronic element involved with the systems will now allow for complete, incident and patrol integration. This systems generates an automatic entry of the patrol tour, completed by the properties security guards, while being able to capture that information directly into the iTrak daily log, for real-time status updates.

iView Systems is focused on the delivery of security and surveillance incident management software, advanced integrated reporting services and training. These products & services reduce associated losses by the rapid identification of individuals involved in loss, threat creation and other specific activities. iView provides unique software platforms and services to the global security marketplace, with specific emphasis on the gaming and financial industries. iView Systems specific focus in the market place is as a solutions provider for the development and deployment of advanced security and surveillance tools.

“Collaborating with Guard Tour Systems is a logical next step for iView. This integration allows us to continually offer our clients new and top of the line solutions for their security and surveillance environments. Only companies that have demonstrated high levels of customer service, and software are considered by iView.” said James Moore, Vice President of iView Systems. “TourTrax offers a host of Real-time Guard Tour features that are unmatched in the Industry.”

### **Quote from Naresh at Guard Tour Systems**

“We welcome the opportunity to collaborate with Iview Systems to provide integrated solutions that extend the Best Practices that today’s Professional Security Managers have to expect of their Surveillance and Reporting Systems” said Naresh Naran, President of Digital Security Concepts Inc. “Our combined Industry knowledge and expertise will result in setting new standards in the delivery and monitoring of the performance and activity information of Patrolling Security Officers who remain the cornerstone of any Security Department.”

#### **About Guard Tour Systems:**

Founded in 1987 Digital Security Concepts, Inc. specializes in providing Centralized Enterprise Guard Tour Reporting Systems that are used to verify and document the activities of Security Officers as they conduct patrol rounds and property inspections at multiple sites. Our customers include a broad spectrum of Security departments, in Industrial and Commercial environments and some of the North Americas largest Contract Security providers.

Our TourTrax Network reporting platform is used to reduce premises liability risk in the Hospitality and Healthcare sectors, and is also used very effectively to help increase Security visibility in the Retail and Industrial sectors. Our unique data collection hardware is designed specifically to meet the unique needs within the commercial security environment, namely ruggedness, reliability and ease of use.

#### **About iView Systems:**
